News from the Department

Congratulations Steven Poelhekke! Steven became Research Fellow of CEPR, joining the programme on International Trade and Regional Economics. CEPR is a fully international network of approximately 1,300 research economists with a broad European base. The Centre’s goal is twofold: to promote world-class research, and to help get the policy-relevant results into the hands of public- and private-sector decision-makers. Research Fellows must demonstrate an outstanding record of scholarly publications in leading international journals, an overlap with the Centre’s current research activities and the potential for collaboration with members of the Centre’s various research networks. - Hoe airbnb toch weer aan het langste eind trekt (Hans Koster and Jos van Ommeren, NRC, 4 December)
**Welcome…**

As per February 1, [Maciej Swiderski](#) will join our department as PhD student within research project HERILAND, supervised by Jaap Boter and Niels van Manen. Maciej got his first master from the American Studies Center at the University of Warsaw in 2014 where he studied the influence of modernist planning policies on the emergence of grassroots movements in post-war New York City. His research topic led him to become one of the main initiators of the first Polish translation of Jane Jacobs’ *The Death and Life of Great American Cities*. Apart from that, he was involved in various urban and architecture themed NGOs devising strategies to increase active public participation in Polish cities. Between 2016 and 2018, he took part in the 4Cities Master program in Urban Studies organized by six universities across Europe. Here, his research focus shifted towards discursive marginalization with Copenhagen’s Nørrebro neighbourhood serving as the main case study.

**Sofia Oliveira** is twenty years old and currently taking a degree in environmental engineering (3rd year) at Nova University in Lisbon. Sofia will do an internship from 24th January to 29th of February, under supervision of Eduardo Dias. Her research interests cover urban and regional planning.

**Goodbye…**

[Photo of Qing Li]

[Qing Li](#) has left our department in January. She has been a visiting researcher at our department for one year. She will go back to China and work at Shandong University of Science and technology located in the beautiful coastal city of Qingdao. “I sincerely appreciate everyone’s patience and help during the past year. All of you are welcome to China and I hope we have a chance to meet again. I can be reached at i_liqing@163.com.”

**Peter Mulder** will leave the Department of Spatial Economics at VU to start a new job as scenior scientist at TNO Energy Transition Studies. Peter: “It has been a great privilege to work at the Spatial Economics group for many years. At TNO I will be engaged in applied research on the economic aspects of the transition to a low-carbon energy system. I can be reached at peter.mulder@tno.nl and www.petermulder.net.”
Spatial Economics' publications
